Commercial Pricelist and Descriptions - 2017

Note: The annual price adjustments will be based on the 12 months non-seasonal adjustment percentage rate for state and local government compensation provided by the Bureau of Labor Statistics Employment Cost Index.

Commercial Labor Category	Functional Responsibility	Hourly Rate
Subject Matter Expert Level III	Senior is employed for a specific period or for a defined deliverable product which requires specialized technical or functional experience or skills. He/she applies subject matter expertise to resolve complex technical or functional problems. Provides extremely high level subject matter expertise for work described in the task. Provides advanced technical knowledge and analysis of highly specialized applications and operational environment, high-level functional systems analysis, design, integration, documentation, training, and implementation advice on complex problems which require doctorate level knowledge of the subject matter for effective implementation. Participates as needed in all phases of development with emphasis on the planning, analysis, testing, integration, documentation, training and presentation phases. Applies principles, methods, and knowledge of specific functional areas of expertise to specific task order requirements. Provides advice on esoteric problems which require extensive knowledge of the subject matter. Designs and prepares technical reports, studies, and related documentation, makes charts and graphs to record results, prepares and delivers presentations, training, and briefings as required by the task order.	$242.000
Subject Matter Expert Level II	Senior is employed for a specific period or for a defined deliverable product which requires specialized technical or functional experience or skills. He/she applies subject matter expertise to resolve complex technical or functional problems. Provides extremely high level subject matter expertise for work described in the task. Provides advanced technical knowledge and analysis of highly specialized applications and operational environment, high-level functional systems analysis, design, integration, documentation, training, and implementation advice on complex problems which require doctorate level knowledge of the subject matter for effective implementation. Participates as needed in all phases of development with emphasis on the planning, analysis, testing, integration, documentation, training and presentation phases. Applies principles, methods, and knowledge of specific functional areas of expertise to specific task order requirements. Provides advice on esoteric problems which require extensive knowledge of the subject matter. Designs and prepares technical reports, studies, and related documentation, makes charts and graphs to record results, prepares and delivers presentations, training, and briefings as required by the task order.	$182.00
Subject Matter Expert Level I	Provides technical knowledge and analysis of highly specialized applications and operational environment, high-level functional systems analysis, design, integration, documentation and implementation advice on exceptionally complex problems which require graduate level knowledge of the subject matter for effective implementation. Participates as needed in all phases of software development with emphasis on the planning, analysis, testing, integration, documentation and presentation phases. Applies principles, methods and knowledge of the functional area of expertise to specific task	$160.00

	order requirements, advanced mathematical principles and methods to exceptionally difficult and narrowly defined technical problems in engineering and other scientific applications to arrive at automated solutions. Designs and prepares technical reports, studies, and related documentation, makes charts and graphs to record results. Prepares and delivers presentations and briefings as required by the task order. Technical support includes technical advice on security requirements for highly specialized IT applications, technical report preparation or other services as required by the task order.	
Consultant Specialist Level IV	Provides customer support in solving all phases of complex information assurance-related technical problems. Reviews and recommends information assurance solutions to customer problems based on an understanding of products/systems test results. Conducts systems security analysis and implementation, system engineering, electrical design, design assurance, testing, software engineering, program design, configuration management, integration and testing of information assurance products and techniques. Solutions are based on a firm understanding of government/industry policy, practices, procedures, customer requirements, and emerging security technologies and future trends in support of information system and network security. Insures that information assurance solutions are fully compatible with or engineered into the customer's network design. Provides work direction and guidance to other personnel; ensures accuracy of the work of other personnel, operates under deadlines and able to work on multiple tasks. Able to bring unique skillsets and experience not commonly available to IA environments.	$150.00
Consultant Specialist Level III	Provides customer support in solving all phases of complex information assurance-related technical problems. Reviews and recommends information assurance solutions to customer problems based on an understanding of products/systems test results. Conducts systems security analysis and implementation, system engineering, electrical design, design assurance, testing, software engineering, program design, configuration management, integration and testing of information assurance products and techniques. Solutions are based on a firm understanding of government/industry policy, practices, procedures, customer requirements, and emerging security technologies and future trends in support of information system and network security. Insures that information assurance solutions are fully compatible with or engineered into the customer's network design. Provides work direction and guidance to other personnel; ensures accuracy of the work of other personnel, operates under deadlines and able to work on multiple tasks.	$130.00
Consultant Specialist Level II	Provides customer support in solving phases of complex Information assurance-related technical problems. Reviews and recommends information assurance solutions to customer problems based on an understanding of products/systems test results. Conducts systems security analysis and implementation, system engineering, electrical design, design assurance, testing, software engineering, program design, configuration management, integration and testing of information assurance products and techniques. Solutions are based on a firm understanding of government/industry policy, practices, procedures, customer requirements, and emerging security technologies and future trends in support of information system and network security. Provides work direction and guidance to other personnel; ensures accuracy of the work of other personnel, operates under deadlines and able to work on multiple tasks.	$120.00
Consultant Specialist Level I	Provides customer support in solving low-level information assurance-related technical problems. Conducts systems security analysis and implementation, testing, configuration management, and testing of information assurance products and techniques. Solutions are based on a firm understanding of government/industry policy, practices, procedures, customer requirements, and emerging security technologies and future trends in support of information system and network security.	$105.00
Training Analyst Senior	Develops, implements, and maintains training scenarios, approaches, objectives, plans, tools, aids, curriculums, and other state of the art technologies related to training and	$150.00

	behavioral studies. Identifies the best approach training requirements to include, but not limited to hardware, software, simulations, course assessment and refreshment, assessment centers, oral examinations, interviews, computer assisted and adaptive testing, behavior-based assessment and performance, and team and unit assessment and measurement.	

Experience and Educational Requirements

Commercial Labor Category	General Experience and Minimum Years of Experience	Educational Requirements
Subject Matter Expert Level III	10 Years experience providing expert advice, assisting guiding, counseling or managing others in support of technical management and initiatives and organizational and business improvement efforts and related experience in the identified field of study or specialization. The Subject Matter Expert is required to provide proven experience and expertise with depth and breadth of knowledge on a specific problem, task, or subject.	Bachelor's in Business Administration, Information Technology, Computer Science, Engineering, or other related discipline and Advanced Degree and fifteen (10) years of relevant experience.
Subject Matter Expert Level II	7 years of task related experience in the identified field of study or specialization. The Subject Matter Expert is required to provide proven experience and expertise with depth and breadth of knowledge on a specific problem, task, or subject.	Bachelor's Degree in Information Technology, Computer Science, Engineering or other related discipline. And Advanced Degree from an accredited college or university in Business Administration, Computer Science, Engineering, Information Technology or other related discipline, or a MS in Business Administration or Information Technology with qualifying experience.
Subject Matter Expert Level I	3 years of intensive and progressive experience in the individual's field of study and specialization	Bachelor's Degree in Computer Science, Information Systems, Engineering, Business or other related discipline, or comparable experience in the field.
Consultant Specialist Level IV	10 years experience.	Bachelor's degree in Computer Science, Information Systems, Engineering, Business or other related discipline, as well as CISSP or equivalent Information Assurance Certification.
Consultant Specialist Level III	7 years experience.	Bachelor's degree in Computer Science, Information Systems, Engineering, Business or other related discipline, as well as CISSP or equivalent Information Assurance Certification.
Consultant Specialist Level II	5 years task related experience.	Bachelor's degree in Computer Science, Information Systems, Engineering, Business or other related discipline.
Consultant Specialist Level I	2 years task related experience.	Bachelor's degree in Computer Science, Information Systems, Engineering, Business or other related discipline.

Training Analyst Senior	2 years intensive or progressive experience in the individual's field of study or specialization. Master's degree may be substituted for experience requirement.	Bachelor's degree in Computer Science, Information Systems, Engineering, Business or major field of study which provides substantial knowledge relevant to the task order.
